Contents

A4 Editorial Board
A6 Highlights of this issue

Editorials
83 The classification of depression: are we still confused?
   J. Cole, P. McGuffin and A. E. Farmer
86 Metabotropic glutamate receptor agonists for schizophrenia
   P. J. Harrison

Special article
88 Improved investment in mental health services: value for money?
   D. Goldberg

Review article
92 Semantic priming in schizophrenia: systematic review and meta-analysis
   E. Pomarol-Clotet, T. M. S. S. Oh, K. R. Laws and P. J. McKenna

Papers
98 Cross-national prevalence and risk factors for suicidal ideation, plans and attempts

105 Word pictures of depression: anhedonia
   S. McConville

106 Area factors and suicide: 5-year follow-up of the Northern Ireland population
   D. O’Reilly, M. Rosato, S. Connolly and C. Cardwell

111 Word pictures of depression: tearfulness
   S. McConville

112 Lifetime prevalence of psychiatric disorders in South Africa
   D. J. Stein, S. Seedat, A. Herman, H. Moorman, S. G. Heeringa, R. C. Kessler and D. R. Williams

117 Dementia with Lewy bodies – in 100 words
   I. McKeith

118 Attention-deficit hyperactivity disorder as a potentially aggravating factor in borderline personality disorder
   A. Philipsen, M. F. Limberger, K. Lieb, B. Feige, N. Kleindienst, U. Ebner-Priemer, J. Barth, C. Schmahl and M. Bohus

123 The medical certificates of admission papers – 150 years ago
   Researched by T. H. Turner

124 Antidepressant medications v. cognitive therapy in people with depression with or without personality disorder
   J. C. Fournier, R. J. DeRubeis, R. C. Shelton, R. Gallop, J. D. Amsterdam and S. D. Hollon

130 Comparative randomised trial of online cognitive–behavioural therapy and an information website for depression: 12-month outcomes
   A. Mackinnon, K. M. Griffiths and H. Christensen

135 Olanzapine plus carbamazepine v. carbamazepine alone in treating manic episodes

144 Influences on young people’s stigmatising attitudes towards peers with mental disorders: national survey of young Australians and their parents
   A. F. Jorm and A. Wright

149 I am by John Clare
   R. Howard

Short reports
150 Incidence of childhood-onset bipolar illness in the USA and Europe

152 Childhood and adulthood socio-economic position and midlife depressive and anxiety disorders
   S. A. Stansfeld, C. Clark, B. Rodgers, T. Caldwell and C. Power

Columns
154 Correspondence
155 Book reviews
158 Contents of the American Journal of Psychiatry
159 Contents of Advances in Psychiatric Treatment
160 From the Editor’s desk

Cover picture
The Madhouse (painted some time between 1808 and 1814) is one of Francisco de Goya’s (1746–1828) best known paintings. His aunt and uncle had suffered from major mental illnesses and when Goya developed a sudden loss of balance with deafness and partial blindness in 1792 he must have wondered if he was himself on the edge of madness. Around this time, in 1793 or 1794, he painted The Yard of Madmen based on a visit he had made to a psychiatric hospital in Zaragoza. He made only a partial recovery from his illness and was left totally deaf. Reliant upon sign language for communication, he became increasingly isolated and mistrustful with periods of profoundly depressed mood. Through the staged composition of The Madhouse Goya uses the asylum as a pessimistic metaphor for the corruption of Spanish society following Napoleon’s invasion and occupation of Spain in 1808 to 1814. The patients are each symbolic representations of the Church, Army, King and People of Spain. Reproduced with permission of the Museo de la Real Academia de Bellas Artes de San Fernando, Madrid. Thanks to Dr Miriam Barrett for submitting the image.
